<i>Traffic-related noise pollution in the town of Szczecinek (Poland)</i>	139
Grażyna Totczyk	
<i>Wastewater management in rural areas in the light of the principles of sustainable development</i>	147

Preface

Geography and Tourism is an interdisciplinary scientific journal aimed at promoting the results of theoretical and empirical research in geographical sciences and tourism. It is a pleasure to announce that in 2015 the journal scored 6 points on List B of the Ministry of Sciences and Higher education.

Following the decision of the Minister of Science and Higher Education, the journal has been granted funds for pursuing activities aimed at promoting science: reviews of articles by foreign scholars/experts and translation of submitted articles into English in 2017/2018. The tasks are financed under the agreement no. 777/P-DUN/2017.

Current issue of the journal includes papers focused on tourism, and physical geography. The first article, opening the volume, evaluate the publishing output of the UKW Institute of Geography from its foundation in 1995 until the end of the year 2017 at the background of other geographical units in Poland. We sincerely thank the authors and reviewers for their contribution to the development of the journal.

We encourage you to submit research results for the next issues of Geography and Tourism. Instruction for authors is provided on the journal webpage www.geography.and.tourism.ukw.edu.pl.
